

Mission Essential Competencies (MECs) Research

Goals

- Identify individual, team and inter-team competencies associated with combat mission readiness
- Define knowledge, skills, and abilities
- Quantify “gaps” between critical training and operational events
- Specify initial and recurring training requirements

Approach

- Tie content to mission critical needs
- Develop metrics to assess MEC proficiency and retention
- Link live flight and DMT experience to MEC development and maintenance
- Develop MEC-based spin-up curriculum for ACC
